

Cyto
Liquid

Product Insert

A Medical Food for the dietary management of Mitochondrial Cytopathies or Biotinidase Deficiency.

Description

Each 30 mL bottle contains:

Active Ingredients:

Biotin

Inactive Ingredients:

Purified water, glycerine, xanthum gum, potassium sorbate.

Indication and Usage

Cyto B7 is indicated for the distinct nutritional requirements of individuals under a physician's treatment for a mitochondrial disorder or with Biotinidase Deficiency.

Precautions

Only for individuals with a diagnosed mitochondrial disorder or with Biotinidase Deficiency.

Adverse Reactions

None known.

Contraindications

Known hypersensitivity to any of the components in the product is a contraindication.

Drug Interactions

None known.

Patient Information

Use only under the direction and supervision of a healthcare professional specialized in mitochondrial diseases or inborn errors of metabolism.

Dosage and Administration

The daily amount of Cyto B7 liquid is to be determined by a physician or dietitian specialized in mitochondrial diseases or metabolic disorders and is based on age, body weight and metabolic condition of the patient. Cyto B7 should be consumed in equal portions throughout the day. Each milliliter (mL) contains 5 mg of Biotin.

How Supplied

Available as an unflavored, liquid contained in 30 mL bottles.
