Directions of Use: VB6 P5P is soluble in formula and thicker liquids. It can be consumed either orally or via tube feeding. The daily intake of VB6 P5P powder is to be determined by your physician or dietitian.

Oral or Tube Feeding

1. Measure (using the scoop provided or a gram scale) the recommended amount of VB6 P5P powder.
2. For oral, consume powder by either sprinkling on food, mixing into moist foods or liquids, or taking directly by mouth followed with water.
3. For tube feeding, add powder in 1 g (one scoop) increments to the formula (room temperature or cold) and stir well. Stir or agitate tube feeding mixture if VB6 P5P, as needed. VB6 P5P powder and formula mixture should be used within 4 hours

Warning: Not for parenteral use. Not for use as the sole source of nutrition and not for the general population. Only for individuals with Vitamin B6 Responsive Disorders. **Use under medical supervision.**

Storage: Unopened bottles should be kept in a cool, dry place. Reseal unopened bottles, stores in a refrigerator and use within three months.
