

Directions of Use: Galaxtra® is soluble in water and can be consumed either orally or via tube feeding. The daily intake of Galaxtra powder is to be determined by your physician or dietitian.

Oral or Tube Feeding

1. Measure (using the scoop provided or a gram scale) the recommended amount of Galaxtra powder.
2. For oral, consume powder by either sprinkling on food, mixing into moist foods or liquids, or taking directly by mouth followed with water.
3. For tube feeding, add powder in 5 g (one scoop) increments to the formula (room temperature or cold) and stir well. Stir or agitate tube feeding mixture if Galaxtra separates from formula during feeding. Galaxtra powder and formula mixture should be used within 4 hours

Warning: Not for parenteral use. Not for use as the sole source of nutrition. Only for individuals with Congenital Disorders of Glycosylation.

Use under medical supervision.

Storage: Unopened bottles should be kept in a cool, dry place. Reseal unopened bottles, store in a refrigerator and use within three months.
