

Directions of Use: LDL Care® is dispersible in formula and thicker liquids. It can be consumed either orally or via tube feeding. The daily intake of LDL Care powder is to be determined by your physician or dietitian.

Oral or Tube Feeding

1. Measure (using the scoop provided or a gram scale) the recommended amount of LDL Care powder.
2. For oral, consume powder by either sprinkling on food, mixing into moist foods or liquids, or taking directly by mouth followed with water.
3. For tube feeding, add powder in 1.0 g (one scoop) increments to the formula (room temperature or cold) and stir well. Stir or agitate tube feeding mixture of LDL Care powder, as needed. LDL Care powder and formula mixture should be used within 4 hours.

Warning: Not for parenteral use. Not for use as the sole source of nutrition and not for the general population. Only for individuals with Inborn Errors of Lipid Metabolism.

Use under medical supervision.

Storage: Unopened bottles should be kept in a cool, dry place. Reseal unopened bottles, stores in a refrigerator and use within three months.
